HOUSTON ASTROS

MANAGER HUB

DAILY SCHEDULING — QUICK START GUIDE

Build, customize and publish your team's daily schedule in minutes.

cperez.app/apps/manager-hub

1. **Select your team and date**
2. **Build manually or with AI**
3. **Review and publish**

A BUILD YOUR DAILY SCHEDULE

1 Choose your affiliate

Click the team name at the top left to switch workspaces.

Triple-A · Double-A · High-A · Single-A · **Complex**

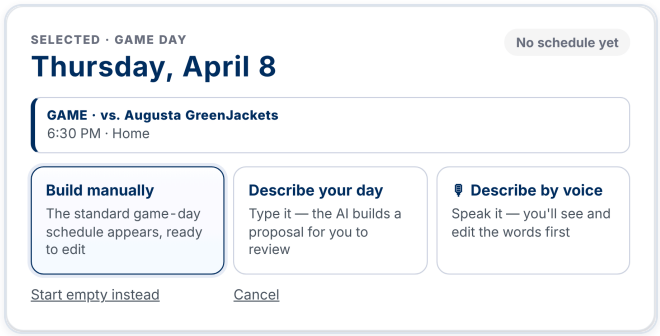

Complex covers workouts and camps with players from every affiliate (the **Camps** tab).

2 Select a date

The calendar opens on **today**. Tap any date. Games are already there — **vs** for home, **@** for road — and the selected day shows the opponent and first pitch.

3 Click Build Daily Schedule

Pick how you want to build — the real screen looks like this:

Build manually places the standard game-day activities; **Describe your day** and **Describe by voice** use AI. **Start empty instead** gives a blank day.

4 Review & publish

Click any block to change its time, length, group or facility, or drag it. **Save draft** keeps it as a draft; **Publish →** shows every change, then **Publish schedule** makes it official. Nothing is published until you approve it.

B STANDARD GAME-DAY TIMES

Manager Hub reads first pitch from the imported game schedule and places these for you:

ACTIVITY	STARTS	LENGTH
Home BP Home batting practice	**2 h 30 min** before	45 min
Visitor BP Visitors' batting practice	**1 h 45 min** before	45 min
Pregame Warmup	**20 min** before	10 min
Anthem National anthem	**10 min** before	10 min

EXAMPLE — 6:30 PM GAME

placed automatically

4:00–4:45	Home BP
4:45–5:30	Visitor BP
	open time for your own work
6:10–6:20	Pregame Warmup
6:20–6:30	Anthem
6:30 PM	First pitch

- **Every time is editable** on the day; defaults can be changed under **Game Day Defaults**.
- Game times come from the affiliate schedules, in the ballpark's local time. Check for postponements and time changes — if a game moves, Manager Hub offers to recalculate.
- First pitch TBD? You'll be asked for it first. Doubleheader? Choose which game to build around.

C USING THE AI SCHEDULE BUILDER

EXAMPLE — TYPE OR SAY

"Catchers report at 1:30 PM. Early hitting starts at 2:00. Pitchers stretch at 3:00. Add a defensive meeting before BP."

DESCRIBE → REVIEW → PUBLISH

- ✓ **Use ordinary language** — say the times, groups and activities you know.
- ✓ It knows the selected date and that day's game; the standard game-day times stay unless you change them.
- ✓ **It only proposes.** Edit anything, ask for changes ("move BP 15 minutes later"), then publish.
- ✓ Voice works in Chrome, Edge and Safari. If AI is unavailable, the built-in reader and manual building still work.

Games are already loaded
No need to enter opponents or first pitch.

Everything is adjustable
Add, move, resize or remove any activity. Undo is always there.

Reopen any time
A day with a schedule shows **Edit Daily Schedule** and its Draft or Published status.

Complex days
Without a game, Complex starts from a standard workout day, not game-day times.
